

Innovation Solutions with Technology Scouting

Ezassi Technology Scouting software is driving cutting edge research while reducing costs and complementing R&D and engineering departments around the world. It offers insights into emerging tech, patents, subject matter experts, and financial analytics - all on one platform. Subscription-based tool access is available, as well as full-service technology scouting research projects.

Market Trends & Technology Analysis Reports

- **Trend Scan** - A meaningful snapshot of a technology space
- **Technology Scouting Report** - Tactical, short-term goal to identify emerging technologies
- **Technology Landscape Report** - Strategic, long-term plan anticipating disruptive technologies
- **Horizon Scan** – Nascent tech & novel methods predicted 10 years in the future

Learn more about our technology scouting services

Ezassi's Technology Scouting software mines big data, offering a deep dive into the digital universe where scouters can identify prime targets for innovation and capitalize on opportunities, to innovate *faster*.

Technology Scouting • Ideation & Collaboration Software

Ezassi has the technologies and services to accelerate your innovation lifecycle. Our solutions will expedite Innovation Strategy, Ideation, Collaboration, Technology Discovery and Scouting initiatives, empowering your key innovation objectives.

KEY BENEFITS

- Improve target discovery and reveal adjacencies
- Identify disruptive and emerging technology
- Locate startup incubators, source vendors and subject matter experts
- Save significant time and resources

Full-Service Technology Landscape and Scouting Research Projects

Our Technology Scouting team works with R&D and engineering departments across all industries to help them solve for their innovation pain points. We pride ourselves on the ability to operate in the rapidly moving global arena and have perfected the art of identifying disruptive and emerging technology, locating startups, and sourcing vendors.

Research Projects deliverables:

- Technical Brief
- Weekly checkpoints
- Detailed Technology Solutions to match your brief
- Access our large network of Subject Matter Experts
- Executive summary of key findings and trends
- Clear recommendations established from the outcomes of the project

Are you a Subject Matter Expert in alternative proteins or fermentation?

Ezassi is interested in your innovative ideas for sustainability and novel production methods in the Food and Beverage Industry. Our CPG clients are looking for your expertise as a consultant, and there are partnership opportunities for upcoming projects.

Please connect with us in a brief [survey](#).
